FINANCE AUTOMATION & AI PROJECTS

Financial Statement Review Workflow - Microsoft Power Automate

- Designed and implemented a **Power Automate** workflow to streamline financial statement preparation and review activities through improved tracking, notifications, handoffs, and follow-up visibility, saving approximately **10 hours per month**.
- Improved process discipline by centralizing review status, reducing manual follow-ups, and supporting timely completion of financial reporting activities.

Custom Process Query Agent - Microsoft Copilot and Copilot Studio

- Built a custom Copilot-based process query agent to answer recurring process-related questions, centralize workflow guidance, and support faster query resolution for resources.
- Reduced repetitive knowledge-sharing effort by making process steps, guidance, and common query responses easier to access through an AI-assisted support channel.

Power BI Finance Analytics Portfolio

- Maintains a **Power BI** project portfolio focused on finance analytics, reporting visibility, and dashboarding, supporting the transition toward data-driven financial reporting and **finance transformation** roles.

PROFESSIONAL EXPERIENCE

PricewaterhouseCoopers Service Delivery Center Pvt. Ltd. (PwC) | Associate 2 - Financial Reporting & Fund Accounting | July 2022 - Present

- Prepare **US GAAP** financial statements and related disclosures using **Workiva**, supporting connected reporting workflows, review cycles, and financial statement preparation activities.
- Support **Record-to-Report (R2R)**, month-end and quarter-end close activities, including accrual support, reconciliations, financial statement flux analysis, disclosure checks, and reporting support under **US GAAP**/**IFRS** requirements.

- Designed and implemented a **Power Automate** workflow to streamline the financial statement preparation and review process, improving tracking, handoffs, follow-ups, and review visibility while saving approximately **10 hours per month**.
- Built a custom **Microsoft Copilot** and **Copilot Studio**-based process query agent to support process-related questions, reduce repeated manual queries, and improve access to workflow guidance for resources.
- Perform reconciliations using **BlackLine** and coordinate with cross-border teams to resolve reporting queries, review comments, and disclosure-related issues within close timelines.
- Collaborate with US client stakeholders to improve reporting accuracy, financial disclosure quality, and delivery discipline.
- Received **Letter of Appreciation** from Assistant Vice President on the US client side for strong performance and client service.
